MUMMY MANIA

In the past, people believed that when they died they went to another world. In many parts of the world, people thought that when a person died, he or she needed their body in that world. So, they made dead people into mummies. They also put food, jewellery, clothes and other things in the pyramids with the mummies.

Most mummies come from Egypt. Some are 4000 years old! The most famous one is the mummy of Pharaoh Tutankhamun (say it: toot-an-ka-men). He died when he was 17 years old! An English archaeologist, Howard Carter found the mummy of Pharaoh Tutankhamun in 1922.

The Incas made people into mummies, too. The Inca mummies are about 600 years old. They don't look like the Egyptian mummies, but they also have everyday things with them. In April 2002, archaeologists found over 2000 mummies near Lima, the capital city of Peru.

The Man by the Lake

Last week, I went camping with my friends Larry, Alex and Bill. We went to Mount Farway for the weekend. We were having a great time, so we stayed for a week. However, on the last day, a strange thing happened. We were coming down the mountain when we saw a fantastic lake. We all decided to spend the night there, so we put up our tents. In the evening, we felt very tired so we ate and went to bed early.

However, after a while I heard a man talking. I got out of my tent and saw a young man sitting by the lake. When he saw me, he ran into the water.

I woke my friends up and we all jumped into the water to look for him, but he wasn't there! The next morning, we were getting ready to leave when I heard the man talking again. He was sitting by the lake. 'He's back!' I shouted. But my friends thought I was playing a joke on them.

- The writer and his friends went to Mount Farway last week. T
- They put up their tents on the mountain. F
- The writer went to bed before his friends. F
- The writer was in his tent when he heard a man talking. T
- The writer's friends believed him in the end. F

Welcome to Madrid

The city

Madrid became the capital of Spain in 1561. About three and a half million people live in Madrid and about six million tourists visit it every year!

Getting around

It's cheap to move around Madrid. The metro is the fastest and easiest way to get around, but you can also find taxis and buses easily at any time of the day or night.

Sights

First, you may want to walk around the busy city centre. Start at the Plaza Mayor and visit the interesting shops and cafés. Next, stop at the Prado Museum. There you can find works of art by some of the world's greatest artists like Goya and El Greco. Of course, you shouldn't miss the Reina Sofia Museum. You can see Picasso's famous *Guernica* there! Later you can also visit the famous Retiro Park just behind the Prado Museum. Finally, go and see the amazing Royal Palace. It's got about 3000 rooms, more than any other palace in Europe.

What to eat

Spain is famous for its tapas, small delicious snacks. Stop at any of the snack bars in the city and try tapas and other popular Spanish food.

1. Three and a half million people visit Madrid every year.
2. It isn't difficult to get around Madrid.
3. There aren't any buses at night.
4. You can find some of the world's greatest works of art in the Plaza Mayor.
5. Retiro Park is behind the Prado Museum.
6. Tapas is a kind of Spanish food.

2. Write information about each of the planets.
3. Use ideas from pp. 56-57 of the student's book.
4. Draw or stick pictures to decorate the page.

Jupiter is the largest planet.

It is 777,000,000km from the sun...

Jupiter is the fifth planet from the Sun and the largest planet in the Solar System. It is a gas giant with mass one-thousandth of that of the Sun but is two and a half times the mass of all the other planets in the Solar System combined. Jupiter is classified as a gas giant along with Saturn, Uranus and Neptune. Together, these four planets are sometimes referred to as the Jovian or outer planets. The planet was known by astronomers of ancient times, and was associated with the mythology and religious beliefs of many cultures. The Romans named the planet after the Roman god Jupiter. When viewed from Earth, Jupiter can reach an apparent magnitude of -2.94 , bright enough to cast shadows, and making it on average the third-brightest object in the night sky after the Moon and Venus.
